

FSi Ltd. products are manufactured to rigid standards of quality. No liability can be accepted for the information provided in this document although it is published in good faith and believed to be correct at time of issue. Any drawings provided are for illustrative purposes only. FSi Ltd. reserves the right to alter product specifications without prior notice, in line with our Company policy of continuous development and improvement. Changes due to new findings are possible, errors and misprints are not excluded. No liability whatsoever will be accepted for any loss, damage or injury arising from the use of the information given. FSi Ltd. have no control over the methods of installation, competence of operatives or suitability of site condition. No warranties, expressed or implied, are intended to be given as to the actual performance of the product/system mentioned within this document.

0	Test Data:	
WF549797/F	3	
Test Standa	rd:	
EN 1366-3 Fire Resista	nce Performance:	
	60mm Steel Cable Trunking - 50mm Stopseal Batt	
	140kg/m <sup>3</sup> L/I 400mm	EI120
Supporting	Construction:	
*The support	s ≥ 100mm - Framed and Lined ting construction must meet the fire resistance detail. Supporting construction must be installar's guidance	
Service Sup	pports:	
≤ 400mm *Service sup	ports must be appropriately fire resistant	
Installation:		
-cuts and of should be complete the around the Sealant should should be completed to any voids we cables as the Stopseal B	nen all cut pieces have been installed stoated with Pyrocoustic <sup>®</sup> Sealant. A lay applied to all joint lines formed by piecing installation a small bead of Pyrocoustic extremities of the opening and service ould be smoothed to overlap the wall / stove any masking and dispose of wasted within the trunking, creating a tight and hey penetrate through the substrate.  att <sup>®</sup> insulation applied to the trunking ficents sealed with Pyrocoustic <sup>®</sup> Sealant.	er of Pyrocoustic <sup>®</sup> Sealant ng the seal together. To stic <sup>®</sup> Sealant should be applied s. The bead of Pyrocoustic <sup>®</sup> floor surface by approximately materials.  thin the center of the seal filling compact seal around the xed with Pigtail Screws, joints
